

## DEDICATED PUSH PULL

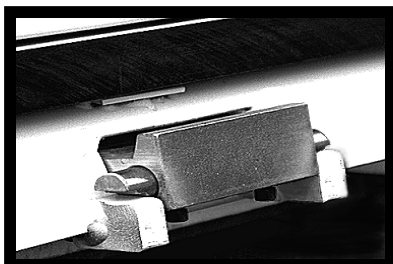

Pin type platen mount

Tall gripper bar

Excellent visibility

Quick disconnect

The LORON push pull is designed to outperform and outlast the competition. Our attention to detail and quality shows in every push pull we ship and we back it up with a one year warranty on parts and labor.

### FEATURES:

Heavy duty design uses high strength A514 steel in the linkage, platens and jaw.

Pin type platens use precision bushings to maintain tip alignment and provide easy platen adjustment.

Tall gripper bar eliminates openings that can catch bags. Urethane gripper pad is easily replaced and is designed for long life.

The push pull is designed for maximum visibility, especially through the jaw.

LORON'S exclusive quick disconnect lower hooks automatically adjust for initial fit and wear.

The push cylinders are designed for maximum speed and are cushioned at both ends for smooth starts and stops.
