

# LIGHT LOADS?

Mariotti's range of 3-wheel counterbalanced electric trucks is the sturdiest most complete in the world for handling small loads. Their strongest feature is their smaller size, which allows them to work in confined spaces where conventional forklift trucks cannot normally be operated.

# SPACE PROBLEM?

Is limited space an issue? Mariotti trucks can drive through a standard door opening, maneuver tight spaces, and ride on elevators!

Model	Capacity (24" LC)	Length / Width <sup>1</sup>	OHG Height	Right Angle Stack*
MINI 4 AC	750	43"/33"	74.8"	94.7"
MINI 6 AC	1100	43"/33"	74.8"	94.7"
ME 8C AC	1500	55"/31.7"	74.4"	106.5"

Mycros 13 AWD	2300	58.8"/37"	78.7"	110.3"
MX 16 AC	3000	63.6"/39.2"	78.2"	115.0"

<sup>1</sup>Varies by mast size

\*Based on a 24" load center and a standard 48" load pallet.

## mini series

### THE WORLD'S MOST COMPACT FORKLIFTS

The smallest front lifting trucks in the world can operate where no other front lifting truck can, without compromising on safety, efficiency, comfort and technology.

## ME series

### SIMPLICITY AND CONVENIENCE

The trucks in Mariotti's ME range are designed to be extremely simple to operate and maintain, offering excellent performances and the best in reliability and convenience.

## MYCROS series

### TECHNOLOGY AND QUALITY AT THE TOP

This is Mariotti's historic range that leads the way in technology, comfort, equipment supplied and optional extras. Plus, you can choose the most appropriate traction:

- Rear-wheel drive (RWD – 1 wheel)
- Front-wheel drive (FWD – 2 wheels)
- All-wheel drive (AWD – 3 wheels)

## MX series

### CONCENTRATED POWER

They may be small, but the trucks in the MX range possess all the power that a Mariotti unit can be equipped with: 48 volts and a load-bearing capacity of up to 3000 lbs.
